

Shinagawa Citizens' Charter on Disaster Prevention

We, the citizens of Shinagawa City, committed to protecting our lives and livelihoods from disaster and to passing on the importance of self-reliance and mutual aid to future generations, do hereby stipulate the Shinagawa Citizens' Charter on Disaster Prevention.

Prepare

Disasters can occur at any time.

Being prepared is common sense.

We will be prepared, to protect ourselves and one another.

Greet

The people in our area can be depended on in a crisis.

Even small connections can grow into something powerful.

We will greet each other and strengthen our ties within the community.

Communicate

We have learned many things from past disasters,

such as how to prepare and how to help one another.

We will share what we have learned and pass it on to future generations.

Act

We will work together and improve our disaster preparedness.

We will participate in training and strengthen our ties within the community.

We will take action and face disasters together.
